(54) Method of displaying data on a client computer

(57) The invention concerns a method of displaying data on a client computer (4) as well as a client computer (4) and computer executable software code for data display on the client computer (4). The client computer retrieves a web page (32) containing statical data of a graphical user interface and at least one inclusion for including the dynamic data of the web page, wherein said inclusion points to a program located at a network server

(2) and adapted to output a script (61). The client computer stores the web page (32) in a cache memory (43). The script that contains dynamic data generated by the program is transferred from the network server (2) to the client computer (4). A browser (42) of the client computer (4) includes the dynamic part into the static part of the web page (32) by means of the dynamic data included in the retrieved script (61).

ABSTRACT:

CHG DATE=20060602 STATUS=O>The invention concerns a method of displaying data on a client computer (4) as well as a client computer (4) and computer executable software code for data display on the client computer (4). The client computer retrieves a web page (32) containing statical data of a graphical user interface and at least one inclusion for including the dynamic data of the web page, wherein said inclusion points to a program located at a network server (2) and adapted to output a script (61). The client computer stores the web page (32) in a cache memory (43). The script that contains dynamic data generated by the program is transferred from the network server (2) to the client computer (4). A browser (42) of the client computer (4) includes the dynamic part into the static part of the web page (32) by means of the dynamic data included in the retrieved script (61).
